

# STONY PLAIN SUN.

VOLUME SEVENTEEN

STONY PLAIN, ALBERTA, THURSDAY APRIL 28, 1937

## ROYAL CAFE, STONY PLAIN.

### FULL-COURSE MEALS, 25c. Up.

FROM 12-2, and FROM 6-8.

Ice Cream, Soft Drinks, Confectionery, Fruit.

**L. M. LARSON, Proprietor.**

## FARMERS' MEAT MARKET.

FRESH MEATS OF ALL KINDS.

DRESSED POULTRY.

CATTLE AND HOGS BOUGHT EVERY DAY IN THE WEEK - HIGHEST PRICES PAID

PHONE SEVEN, STONY PLAIN.

**FREE ! A TWO-HOUR TALKING**

## Motion Picture Show

Ten Reels of Entertaining and Educational Talking Movies on a wide variety of topics, at

**Kelly's Hall, Stony Plain,**

**FRIDAY, APRIL the 30th.**

Two Shows: 3 P.M. and 8 P.M.

Children are requested to attend the Afternoon Program.

**FRRE DANCE--**Those who attend the Evg. show will be entertained at a dance following the pictures.

**EVERYONE INVITED TO ATTEND.**

Under auspices of the General Motors Dealers of Stony Plain:

**Sommerfield & Mayer,**  
Service Garage, Stony Plain.

## COMMERCIAL PRINTING AT PRICES YOU CAN AFFORD. TRY THE SUN PRINTERY

For Posters, Auction Bills, Show Bills, Circulars, Labels, Invoices, Show Cards, Hangers, Loose Leaves, Dance Cards, Shipping Tags, Statements, Tickets, Bill Heads, Memorial Cards, Wedding Invitations, Business Cards, Badges, Prize Lists,

**WHEN IN NEED OF PRINTING,  
GET THE SUN'S PRICES FIRST.**

**DON'T BUY IN THE DARK.  
SPEND YOUR MONEY FOR  
ADVERTISED GOODS.**

## The Navy League Does Valuable Work.

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the Merchant Marine and their dependents; maintaining sailors' homes, institutes etc in our large Canadian ports from coast to coast, and looking after the welfare of our seamen when ashore; training boys and young men and helping to make better Canadian citizens of them, Stony Plain citizens subscribed \$10.25 to this cause in a recent campaign here conducted by Fred Cooke, organizer of the Alberta Division. Contributions can also be sent to F Cooke, 1107 15th av. west, Calgary.

## Silver Wedding Anniversary.

Mr and Mrs John Metzler celebrated their twenty-fifth silver wedding anniversary at their home on Second avenue west, on the evening of Friday, April 8. There was a goodly company of old friends gathered to help in the celebration.

The worthy couple were the recipients of numerous appropriate gifts, as tokens of the high esteem in which they are held. On leaving, they all wished their host and hostess long and happy lives.

Among those present were:

Mrs Ch. Hennig  
Mr and Mrs Joe Hennig  
Mr and Mrs Val Hennig  
Mrs M Forster  
Mr and Mrs John Armbruster  
Mr and Mrs Henry Eiders  
Mr and Mrs Max Kast  
Mr and Mrs Fred Goebel  
Mr and Mrs Joe Ulmer  
Mr and Mrs A K Ulmer  
Mr and Mrs John Schram  
Mr and Mrs H L Kulak  
Mr and Mrs Peter Jansen  
Mr and Mrs Ph Miller Sr.  
Mr and Mrs Val Untersolue

## Calling to Scout Leadeas.

Montreal, April 19--Brightly-burning beacons the length and breadth of Canada will, in age old style, signal the crowning of a King on May 12.

This unique feature in connection with the coronation of His Majesty King George VI will be handled by Boy Scouts of Canada, according to announcement by Sir Edward Beatty, President General Council of the Boy Scouts Association.

Calling to Scout Leader! to take the initiative in organizing celebrations on the occasion of the coronation of His Majesty, who is Scout King of 86,000 Canadian Boy Scouts, Sir Edward recalled the successful coast-to-coast beacon chain in 1935 marking the jubilee of the late King George V.

As public celebrations will be left largely to municipalities, Boy Scouts will again have opportunity to show on a large scale that their organization is one of Canada's important public service bodies, whose training produces young and older citizens of public spirit and enterprise.

In localities where no municipal celebrations have been planned, Scouts will in all probability take the initiative and seek the aid of civic authorities or heads of other organizations in planning appropriate celebrations.

## HARDWICK'S

YOUR HOME TOWN STORE.

### Printed Frocks for Little Ladies.

Pretty and practical Cotton Prints in a stunning array of colors and styles for sizes 8 to 14's. Price, each 69c.

### Oxford Ties for Growing Girls.

Youthful smartness in Black Side Leather Oxfords; stitched and perforated in an attractive manner; sizes 3 to 7 1/2. \$2.50 pair.

### Servwell Washfast Cotton Prints.

36" wide; the Print that's superior, and looks it; stripes, plaids, entrancing florals; all new creations. 19c per yard.

### Merino Work Sox.

Known as "Penman No. 1000"; snug fitting ribbed tops; striped heels and toes. 35c pair.

### Dress Sox for Men.

Knitted from soft yarns; these will give satisfaction and comfort; assorted patterns; sizes 10 1/2, 11, 11 1/2. Per pair, 15c.

### Grocery Specials---Lots of them.

Nabob Chocolate Pudding, delicious, 2 for 15c.  
Lynn Valley Corn, try it today; 2 tins 25c.  
Alberta Cheese, very nourishing. 20c lb.  
Gainer's Lard, specially priced, 3 lbs. 49c.  
Jinger Jinks, famous small snaps, 2 lbs. 25c.  
Scribbles, good quality paper. 6 for 25c.  
SEEDS: Steele-Briggs's and McKenzie's, from 3 cents a packet.

Liberian*

## Breaking Their Backs

More than starting are the figures of expenditures being made for war and defence by the nations of the world recently revealed in tabulated form as an annex to an American cartoon captioned "Just Pocket Money".

The irony of the heading is immediately realized when the figures are scanned and analyzed for they show a progressively increasing expenditure by the combined nations of the world from 1933 onward when the total martial bill was \$3,992,000,000 as compared with \$10,730,700,000 for last year and an estimate of least \$12,000,000,000 for the current year.

Roughly the taxpayers of the world are being asked to increase their contributions to the war god by about two billions of dollars every year. The governments of the countries involved are stepping it up every year by about that amount and have been doing so since 1933.

Now such figures as ten or twelve billions of dollars may not convey very much to the comprehension of the average man on the street in the city or the farmer in the country, but a little reflection on the effect of this enormous drain on the resources of the countries involved, present and future, must surely lead to wonderment at the ability of the people to stand such an enormous drain and speculation as to the length of time that must lapse before financial ruin and chaos will overtake the spenders.

A little reflection on the subject must also lead to the conviction that something must be done to avert the threatened catastrophe, whether through a rejuvenated League of Nations or by some other agency, and that nothing is likely to be done except through the leadership of the democratic group of nations.

The present day situation has been brought about by the aggressiveness of some of the nations who are determined to win back what they lost in the war of 1914-18, by fear on the part of other nations who are afraid of what may happen to them as a result of the aggressiveness on the part of their neighbors and by the dictates of prudence and the force of necessity on the part of the remaining nations who see that unless they are armed purely as a defensive measure, they may become an easy prey in the event of the outbreak of a major conflict despite all desires to remain neutral and pursue the paths of peace.

It is this latter group of nations—the countries which still remain converts to the democratic form of government—represented most powerfully by Great Britain and the United States, which must lead the way in the search for some method to halt this headlong rush towards bankruptcy.

There are some writers who have advanced the theory that the countries espousing the cause of democracy should stand aside and let the protagonists of fascism and communism fight it out among themselves and destroy one another if they want to do it, but this position is untenable in practice for several reasons.

In the first place it is generally agreed by most authorities that democratic neutrality would be almost impossible in the event of a major conflagration between member-nations of the other groups. It is asserted that, willy-nilly, they would be dragged into the conflict, if not in the early stages at any rate before a conclusion was reached; that circumstances, political or economic, or both, would drag them in against their will.

Moreover, it should be pointed out, despite efforts of some of the countries to make themselves self-contained and self-supporting in the last decade, there is so much inter-dependence in these days of widening exchange and increasing rapidity of communications that no groups of important countries could wage warfare without inflicting serious and perhaps irreparable damage on innocent bystanders.

The very fact that Great Britain and the United States have found it necessary to compete in the armaments race is indicative of their recognition of the truth of the foregoing statement.

"What is needed is a new spirit of kinship, a reunion of men and all our peoples of common breed in common purpose" recently said Sir Henry Percy Croft at a meeting in Wales regarding greater unity between the component parts of the British Empire as a means towards "collective security" when he launched what he called an Empire Unity campaign.

No doubt what Sir Henry Percy Croft had to propose on that occasion would serve a useful purpose but the plan might be extended to provide for a common council of all the democratic countries which might be sufficiently powerful to exercise a restraining influence on the activities of those nations which are setting the pace in the armaments race in detriment not only to their own nationals but to those of the democratic countries.

### Long Search Successful

Science Has Isolated Vitamin A In Pure Form

Pale yellow needle-shaped crystals of pure vitamin A, 4,000 times more potent than cod liver oil, were shown to the American Chemical Society at Chapel Hill, North Carolina, in visual proof of success of a 23-year medical quest—isolation of vitamin A, the third to be obtained in pure form.

Vitamin B, for nerves, and vitamin C, for scurvy, had previously been isolated. A is the disease-protection vitamin, which also helps growth and is important to eyesight.

The new crystals were reported about 1,000,000 units stronger than previously obtained vitamin A concentrates. The vitamin unit is an international standard of measurement. The crystals were melted at 3,000,000 units per gram as compared with about 2,000,000 units for other standard vitamin A concentrates.

Client: "I'm charged with stealing a case of brandy, sir, and I'd like to know if you'll take the case."

Barriester: "Certainly! Send it round to this office as soon as you can."

## HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal soreness, do not neglect this danger to the risk of an operation. Any itching, soreness or painful condition of the rectum or anus, if treated with Dr. Finner's Favorite Prescription, will be cured. This medicine is used internally, quickly relieves the itching and soreness, adds to the strength of the rectal muscles, and is a sure cure for hemorrhoids. It is highly recommended by the leading medical authorities, and is so easy to use that it can be taken by anyone, even a child, which is no pleasant to use may be had at such a reasonable cost.

### A Real Magician

General Motors Vice-President Cooks

Charles F. Kettering, General Motors vice-president in charge of research, showed 1,000 persons in the General Motors Auditorium in Detroit how to fry an egg atop a cake of ice.

The egg was placed in a shiny frying pan. Underneath the frying pan was a folded newspaper, which had been placed on the ice, and underneath the ice was a flat coil which stayed cold during the demonstration.

"Very simple," said Kettering, as he explained that the coil was energized by an electric current with a frequency of 1,600 alternations a second.

The demonstration was part of the first showing of General Motors' new road show, "Previews of Progress," which is to be exhibited throughout the United States this year.

### To Protect Regular Shops

Second-class haircuts were five cents apiece and facial treatments only a dime at Victoria following British Columbia regulations regarding barbering trade schools. The man who wants to be a barber must serve 1,000 hours at the above income. The move is to prevent schools from competing with regular shops.

### Name Travelled Far

Cecil Ripley of Amherst, Nova Scotia, marked his name on a piece of hardwood a year ago and forgot all about it. The other day he had a letter from Charles Wilson, a chairmaker in Hoxton, England, who came across the address and wrote him.

### New Device Kept Secret

Radio Spy Owned By U.S. Navy To Be Tested

United States navy department officials disclosed the development of a "radio spy" by which enemy warships can be located or tracked long distances at sea.

Rear Admiral Harold G. Bowen, engineer-in-chief of the navy, first reported development of the device by the department's radio direction-finder experts to congressional appropriations committees which handle navy funds.

Bowen declined to make public details of the "radio spy," citing such information with the committee under a "confidential supplement."

Navy officers, while saying the development was "secret" and could not be discussed, added that it was possible it would be given its first comprehensive test in naval manoeuvres to be held in the Alaska-Hawaii sector in the Pacific this year.

Under the same "confidential supplement," Admiral Bowen also requested funds for the development of a system of cryptography by which warships can transmit signals to another vessel in the fleet which cannot be deciphered by an enemy vessel.

### Valuable Letter Sold

Written By Kipling When Edward VII's Coronation Postponed

A letter describing the gloom in England when the Coronation of Edward VII was postponed because of his sudden illness was among a group of Rudyard Kipling mementos which went on sale in New York.

The letter from the poet to his American mother-in-law, Mrs. H. Wolcott Balestier, of Vermont, is dated June 26, 1902, scheduled date of the Coronation for which England had prepared elaborately.

Only the day before he wrote, Kipling, who was all Englishmen of his day revered the popular Edward, had learned of the King's illness and the postponement of the ceremonies.

"The only thing I can compare the general effect to was being on a gigantic motor car with all the brakes suddenly applied at once . . . all flags, of course, were hauled down and all sports stopped," Kipling wrote, "the little telephone boy was blubbering and it looked as though a grey sponge had been passed over the faces of all people . . . to-day the land seems stunned. . . ."

### Australian Gunner Honored

High Officials Attend Funeral Of Soldier Killed In London

Gunner Arthur Percy Sullivan, V.C., Australian soldier whose sudden, accidental death has saddened London, was honored in a colorful funeral service at the Guards Chapel, Wellington Barracks.

Sullivan, a member of the Australian military contingent in London for the coronation, was killed by a cyclist on Birdcage Walk, outside Wellington Barracks where the Aussies were staying.

An immense turnout of soldiers and civilians, including the Australian high commissioner, Stanley Bruce, and high official representatives of many governments, attended the funeral.

Sullivan, manager of a branch of the Australian Bank at Manly, New South Wales, is survived by a widow and four children. He won the V.C.—the Empire's highest award for valor—in 1915 when he rescued four comrades from northern Russian swamp under heavy fire.

**Coleman**  
**HOT PLATE**  
**Cooks with 96° air**

• Burns 96° air—no gas, no electricity.  
• Makes its own flame from gasoline.  
• No pipes or connections.  
• Lights instantly. No pre-heating.  
• Economical. One gallon of fuel oil runs for 10 hours. One gallon of kerosene runs for 10 hours.

## NEW

# PRESTO-PACK

At grocers, druggists, stationers and department stores.

Warehouses at Calgary, Regina and Winnipeg

## And Far Handier Than Older Ways!!!

Here is the most useful waxed tissue package you've ever seen. This new pack contains 45 sheets of silver white waxed tissue. Through the top of the pack is a metal eyelet for hanging on the wall. Inside, the tissue is held in an ingenious grip so that you can withdraw one sheet at a time by simply reaching out with one hand. "Presto-Pack" thus becomes the handiest of all kitchen aids. You will wonder how you ever managed without it.

**APPLEFORD PAPER PRODUCTS LIMITED**  
HAMILTON - ONT.

### SELECTED RECIPES

**ALMOND CHEWS**  
Temperature: 350 degrees F.  
Time: 1/2 hour.  
1/2 cup butter  
3/4 cup sugar  
1/2 cup "Crown Brand" Corn Syrup  
2 eggs  
1 teaspoon baking powder  
1 1/4 cups bread flour  
1/2 cup Benson's Corn Starch  
1/2 teaspoon salt  
1/2 teaspoon vanilla  
1/2 teaspoon almond flavoring  
Any almonds  
Cream the butter, add the sugar and "Crown Brand" Corn Syrup. Blend well. Add the yolks of the eggs, which have been beaten until thick and lemon colored. Sift together the flour, Benson's Corn Starch, salt and baking powder and add to the first mixture; blend. Add the flavorings. Pat into shape in a greased pan 9"x12" and on top spread the following meringue.

**MERINGUE**  
Whites of 2 eggs  
1/4 cup "Crown Brand" Corn Syrup  
3/4 cup brown sugar  
Stiffly beat the whites of the eggs and gradually add the brown sugar and "Crown Brand" Corn Syrup; beat again until the mixture peaks. Sprinkle the meringue with almonds which have been blanched and chopped. Bake 1/2 hour.

### Exhibition of Needlecraft

Work of Queen Mary Likely To Be Shown

World-famous women will be asked to contribute their own handiwork to an international exhibition of modern tapestries which it is proposed to hold in Sydney, New South Wales, early next year, as part of Australia's 150th anniversary celebrations.

Among them will be Queen Mary, who is a skilled weaver of tapestry pictures, and to whom a cablegram has been sent requesting her to lend a sample of her work to be a feature at the exhibition. Another who has been asked to lend her work is Mrs. Franklin D. Roosevelt, wife of the President of the United States.

The suggestion for the exhibition, and that noted personages should be asked to send their tapestries for display, was made by Lady Gowrie, wife of the Governor-General of Australia.

Australian tapestry weavers will be invited to join in interdistrict competition, and the winning pieces will be included in the display.

If it were not for the sun's attraction, Jupiter would, because of its size, kidnap the other planets and add them to the flock of nine moons which already circle about it.

### Dies During World Cruise

Col. J. Obad Smith Was Former Officer Of Immigration Department  
Lieut.-Col. J. Obad Smith, 73, former chief officer of the Canadian government immigration department in England, died in Yokohama, Japan, according to cable advice to Canadian Pacific Steamships at Montreal. Col. Smith was on a world cruise on the Empress of Britain.

A native of Birmingham, Eng., Col. Smith came to Canada after graduation from Liverpool college. He was called to the bar of Manitoba in 1891 and served with the Manitoba government until 1901 when he became Dominion Immigration commissioner for western Canada.

Col. Smith retired from the service in 1924 and was appointed manager of the Hudson's Bay Company's Overseas Settlement Limited. He resided in Richmond, Surrey. He leaves his widow, daughter of the late Harry Barton Rose of Winnipeg, and two daughters.

### Look And Listen

Drivers Should Exercise More Precaution At Railway Crossings

It is simply impossible in a young country like Canada, with more than 40,000 miles of railway, to eliminate all grade crossings. The best that can be done is by plain signal warnings to protect the public. At the same time, the most dangerous of these crossings are either being abolished entirely or given ample protection. That appears to be as far as Canada can go at the present time in view of the enormous expense entailed in the construction of overhead bridges and subways. The lesson is that the travelling public must give heed and protect itself in the meantime.

The nine of diamonds is called "The Curse of Scotland" in that country.

The United States and China produce the largest amount of poultry.

### Nerves At Breaking Point

No need for girls or women to suffer from periodic pains, headache or sideache. Many find that Dr. Finner's Favorite Prescription is a very beneficial tonic. This is what Mrs. J. L. Moore of No. First St., Niagara Falls, N.Y., writes: "Years ago I was in a run-down, weakened condition. I could not stand on my feet. I took Dr. Finner's Favorite Prescription and my appetite improved and the headaches and other trouble disappeared." Buy now!

# Evolution Of The Canning Industry From Early Times To Present Day Methods

Back in 1795 nearly every nation in Europe was fighting France and she had revolution at home. The Government needed some way of feeding its armies abroad and its sailors at sea. Scrumy ravaged the sailors; foraging was not always feasible in the Napoleonic campaigns. A prize was offered to the Frenchman who would solve the problem. It was won by Nicholas Appert in 1809.

He was the Father of Canning and therefore, the Father of the Tin Can, although his first experiments were performed with glass jars and bottles, closed with cork. Appert's theory, worked out long before Pasteur, is the theory still followed by commercial canners to-day. He sterilized the food by heat and he sealed the container hermetically. Though his apparatus was crude and awkward, he was painstaking and thorough, and he perfected a theory, and put it to the test that has proved one of the greatest benefactions to mankind's comfort and health.

While Appert was thus engaged, an Englishman named Peter Durand, obtained a patent in 1810 for a tin plate canister. Now we see the first tin can emerging out of history. It was cylindrical, like the one we see coloring our grocery and pantry shelves to-day, but was made entirely by hand. The raw material was lavishly thinned iron sheet. Using shears and a soldering iron, a tin-smith cut an oblong piece of tin, curved it and soldered its ends together to form the body. Then he cut a round piece for the bottom of the can, bending its edges over a circular mandrel, and soldered this on one end. After this was filled with fruit, fish, vegetable or meat, a similar round piece was soldered on the top. A small hole was left in the top so that air could escape, as the food in the can expanded while the can boiled. With the can still hot, a drop of solder closed the hole.

With Appert's method and Durand's canister, meat was successfully put up for sea voyages. The canning industry had been launched and the can making industry was on its way. Appert, who received a prize of 12,000 francs from Napoleon, had really started four great industries—canning, can manufacture, canning machinery manufacture, and can making machinery manufacture that have defeated Nature's parsimonious way of parceling out man's foods according to harvesting seasons and at no other time. The tin can places June foods on the January platter.

The scene now changes to America. The Civil War furnished the first boom for canned foods and increased their production so much as to inevitably shoot can manufacture up into volume. About 5,000,000 cans were made at the beginning of the war. By 1870, the output had increased six fold.

And it was at this stage that several inventions of importance in canned foods processing acted to increase the volume of tin cans. Canners were still processing (cooking) by boiling the can for long periods. A Baltimore canner named Isaac Solomon applied an English discovery to the process. He added calcium chloride to the boiling water. Its temperature was increased to 240 degrees plus. Overnight, thus, the necessary for sterilization was reduced from five or six hours down to half an hour. The canner whose kettle capacity would produce 1,000 cans was able to turn out 10,000. This occurred on the threshold of the Civil War in 1861.

That great disturbance gave many people their first taste of canned foods. Soldiers ate them in their bivouacs; sailors on their gunboats; the wounded in hospitals. Canning was no longer confined to the seaboard—centres around Baltimore and in New England. Canneries sprang up inland—at Cincinnati and Indianapolis. Borden found a market for his canned condensed milk, after having failed for ten years to sell it over.

Improvements and inventions in the field of canning machinery also played their part in this expansion. Peas had to be shelled and picked

by hand. E. P. Scott and C. P. and J. A. Chisholm perfected a machine that would shell peas from the pod as fast as 1,000 hand workers. Then Scott went a step further and produced the pea vicer, which, by using a paddle principle, knocked the peas out of pods and sifted them. Nearly 600,000,000 cans were needed last year to hold all the peas packed in America.

Someone discovered and broadcast the fact that tomatoes, or Love Apples as they were called then, were not poisonous. Nearly 648,000,000 cans of tomatoes were put up last year, with another 192,000,000 odd cans of tomato juice on top of that.

A machine was perfected that automatically peeled and cored pineapples. Again volume production of tin cans soared. Improvements in salmon, in peaches, pears, apples, all had the effect of adding immediately to can production.

Better cans now were being made. The next style was the "open-top." Tops and bottoms were crimped on without using solder. Thick rubber gaskets made the can air-tight and the crimping of top and bottom was accomplished by folding them over these gaskets.

And then came the most forward step of all—development and perfection of the "sanitary can"—a refinement of the "open top"—and the can you see all about you to-day. This generation of consumers never saw anything else.

This can was brought forth in 1896. Charles M. Ama, a chemist, evolved a liquid compound to take the place of the awkward rubber gasket.

Results were convincing enough to warrant the formation of a company devoted to the manufacture and distribution of sanitary cans. Eight million cans were made the first year. In three years a branch plant went up in Indianapolis; later a plant in Niagara Falls, Ont. These were purchased in 1908 by the American Can Company.

The sanitary can was unquestionably the chief factor in bringing tin can production to its present figure of astounding magnitude, and it was the last achievement of revolutionary aspect in the industrial history of the tin can.

Lacquers, enamels and lithography have come along to adorn and beautify cans but their chief value has always been and always will be their practicability, utility and convenience. The perfect vessel for food—they cook and they carry, achieving Appert's dream—to keep foods edible over long periods of time—Condensed by the New Current Digest from Modern Mechanism.

## Rank And Position

Respected by Prince Talleyrand To Most Trifling Details

The celebrated statesman, Prince Talleyrand, believed that in one's social intercourse with people, rank and position should be taken into consideration and respected even to the most trifling details. Once he invited a number of people to dinner. When the soup course was finished, he offered his guests some beef. First he turned to a Duke who was sitting at his side and asked in a courteous even reverent tone: "Your Grace, may I have the honor of offering you some beef?" To the next guest with a gracious smile—"Marquis, may I have the pleasure of offering you some beef?" To the third in line—a gentle tone: "Dear Count, may I offer you some beef?" To the fourth, benevolently—"Baron, would you care for some beef?" And to the last guest, a diplomatic attache who was seated at the very end of the table, he called out briefly: "Beef!"—Magazine Digest.

Special care should be taken in the lighting of rooms in which children read and play, because childhood is considered the dangerous age for the eyes. Serious defects of vision may result from inadequate or spotty lighting.

See How can be taught to stand erect.

## Praises Work Of V.O.N.

Foreign Minister, Power Tolls Of Aid Given To His Department  
Pensions Minister C. G. Power told the board of governors of the Victorian Order of Nurses that without such organizations as theirs it would be impossible for his department to carry out its work.

It was the duty of the department of pensions and national health and its staff of technical and professional men "to bring to the people the knowledge of that which is most important to them, that is knowledge of the preservation of their own health."

All information, from that of sanitation to child and maternal welfare, he added, must be brought to the attention of the people, a mission in which the V.O.N. does its work.

The minister spoke at a luncheon given by Senator George P. Graham, Brockville Liberal, re-elected president of the executive council for the 12th successive year.

Officers of the order have no apprehension as to visiting nursing work being ultimately taken over and operated by the state, said Miss Elizabeth Smellie, chief superintendent, in her annual report.

"Governments are yet scarcely ready entirely to assume the responsibility for bedside nursing although some interesting plans for nursing service have been evolved here and there in the United States," she said.

Among plans for the future Miss Smellie noted that on request of the Canadian Nurses' Association a sub-committee had been appointed to discuss with the V.O.N. the possibility of a joint experiment in community nursing service bureau.

Senator Cairine Wilson's report as chairman of the education and public committee, said:

"We must create a consumer demand in districts which need and could support a branch, and where no nursing service is now available. In other centres our assistance is limited either for financial reasons or because the public is not yet fully aware of the many types of nursing service available."

## Befriended Soldiers

Woman Who Established Recreational Centre Dies In Toronto

Widely known by Canadian soldiers who partook of her hospitality in London in war years, Mrs. Annie E. Eaton, widow of Christopher Eaton, died in Toronto a short time ago.

Mrs. Eaton was the daughter of the late Senator Robert Jeffray.

After her only son, Major Jeffray Eaton, of the Grey regiment, was killed in action, Mrs. Eaton established in London the Grey rooms, a soldier recreational centre to which Canadians on leave were welcomed. Her husband died just before the outbreak of war.

Etiquette is the noise you don't make when you are eating soup.

# The Community Spirit Is More Fully Exemplified In The Rural Districts

## Sun Spots Cause Trouble

Disrupt Telegraph And Telephone Services As Well As Radio

Astronomer R. S. Richardson says that observations indicate the energy which causes fadeouts in high frequency radio broadcasts comes from the sun with the speed of light.

When there is an unusually bright gas eruption near a sun spot, energy is transmitted to the earth in eight minutes, causing high frequency broadcasts to fade. These fadeouts last from 15 minutes to half an hour. The longest come about every 54 days.

Somewhat similarly, telephone and telegraph service may be disrupted and the Aurora Borealis, or Northern Lights, made visible in states as far south as California. The latter are due to storms in the earth's magnetic field and sometimes may follow as late as 24 hours the appearance of a large sun spot group.

These disturbances likely will continue for several years. Richardson, staff scientist at the Carnegie Institution's Mount Wilson Observatory, said the maximum of the present 10 or 11 year sun spot cycle probably is two years away.

One of the largest spot groups of all time appeared on the sun the latter part of January. An average of 12 spot groups a day was observed in the February, the largest in the observatory's history. The average dropped to 9.6 a day in March but now has increased to 11 or 12 again.

## Shortage Of Flax

Supply Is Totally Inadequate To Meet Industry Needs

With flax selling at almost \$150 per bushel and the potential supply totally inadequate to meet the requirements of industry for lined products, farmers who have clean land on which grain crops usually ripen without frost injury will do well to consider the production of this high priced crop.

With any new crop it is wise to start in a small way, in order to discover whether conditions are suitable. This is particularly true of flax. The experience thus gained also helps materially in handling future crops.

Since flax is slower-growing than many weeds, to ensure a good crop it must be seeded on clean land—preferably muntersmalt. It is seeded at the rate of two pecks per acre, between the first and the tenth of May.

Some areas of the earth's surface for years do not get enough rainfall to measure, while other sections get several hundred inches annually.

On passing through a small town or village, persons from cities are frequently heard to remark, "How do they ever live in a place like this, I'd die if I had to spend my life in this burg." The blase looks pretty quiet to the chap acquainted with street cars and skyscrapers and accustomed to inhaling second-hand garb fumes in crowded elevators.

There isn't anything very lively looking about the staid houses and church steeples. Neighbors' cows grazing on the side streets seem to add to the placidness of it all and nobody seems to be in a hurry in the little towns that provide dwelling places for a great share of Canada's population. For those who thrive on big-time excitement the little places seem impossible.

An incident occurred at Norland recently that perhaps explains why there are people who can live in the little places and like it. Norland is a small village. Small enough that everyone is acquainted with everyone else. When good-fortune smiles on one family, the whole village is happy. When tragedy strikes in one place or death calls a Norlandite home, there isn't a smile on anyone's face. Everybody feels genuinely sorry and try by visitation and condolence to make the lot as easy as possible for those affected.

Not long ago a fire wiped out one of the finest homes in the village. Not only was the house lost but the furniture and personal effects of the family went up in flames, leaving them temporarily destitute.

Being a small place, folks didn't take the attitude that after all it wasn't any of their business to see that they were clothed and housed and made comfortable. There was a shower of useful and necessary gifts. Not content with this along with considerable personal aid, a benefit dance was held at which a nice sum was realized to help re-establish this family.

With a new home is built there will be no shortage of labor. Folks will just pile in and help build it and get this family on whom misfortune has frowned back on their feet again.

It isn't so hard to live in a little spot where folks do things like these. The Norland incident is typical of what would occur in almost any small town or village in Canada.

When people have a real heart interest, they volunteer their own time, call for synthetic entertainment. In fact it seems to fall pretty flat when weighed against the pleasure of doing a good turn for a neighbor.—Lindsay Post.

## World's Largest Painting

Mural Is Completed For The Paris Exhibition Of 1937

Wielding the largest paint brush in the world—something like a camel's hair street sweeper—chunky, grey-haired Raoul Dufy has been standing on a step-ladder in an abandoned garage outside Paris for many months, while Jacques Maroger, technical adviser to the Louvre, stood below stirring basins full of pigment, water, alcohol and nut oil with an egg.

Last week what they had been working on was completed, a mural for the Paris Exposition of 1937, "largest painting in the world" showing in brilliant blobs of pink, green, yellow, purple and brown the history of electricity from Aristotle to 20th Century Mme. Curie.

Whether or not any oldtime panoramas were bigger, Artist Dufy's painting is the biggest something. Already 1,200 pounds of oil and paint have been spread on 250 separate wooden panels to make a picture 195 feet long, 30 feet high, which will be the central feature of the Palace of Electricity for the Paris Fair. Already arrangements have been made to remove all the panels and ship them to the U.S. as soon as the Paris Fair closes.—Time.

When the sport of fox hunting was in its infancy, it was found that a hunter who had fallen from his mount could be more easily located if he wore a red coat, so most fox hunters now wear red or pink coats.

## A Bit of String and But One Square

Luxurious lace of undreamed of beauty is this for tea or dinner table. A crocheted hook, some string and the clearly stated directions of this easy-to-memorize pattern are all you need to get started. Though the finished piece gives the effect of two squares, it takes but one 5 1/2 inch "key" square, repeated, to give the rich effect. Here's loveliness with durability for years to come whether your choice is a cloth, spread, scarf, buffet set or other accessory. In pattern 5845 you will find complete instructions for making the square shown; an illustration of it and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

WORLD HAPPENINGS  
BRIEFLY TOLD

The Alting (Icelandic parliament) was dissolved following a split among the government parties. General elections will be held June 20.

Part of the pay chest of a Roman legion of the early third century, 20,000 coins have been excavated at Dorchester and a selected 1,000 purchased by the British Museum.

Chancellor Hitler has eaten no butter for four years, according to an article by Otto Dietrich, Nazi press chief, in the National Zeitung of Essen.

A sub-committee of the committee of imperial defence is to examine various processes in the production of oil from coal and other materials found in the United Kingdom.

Protestant church elections ordered by Chancellor Hitler as a means of restoring control to church members through a general synod will be postponed until autumn.

The Duke of Gloucester has taken up residence at York House, St. James's Palace, which was occupied by the Duke of Windsor when he was Prince of Wales.

Several crew members of the British steamship Welsh City, including the chief steward, were arrested at Hakodate, Japan, charged with taking photographs in the fortified zone around that port.

Concession of pension applications before the committee of the Canadian pension commission has been eliminated. Departmental officials said that only 601 applications were now before the committee, just enough to keep them active.

The Manitoba government is urged in a resolution by Winnipeg city council to request from the Dominion a loan of \$400,000 for the city and a further \$100,000 contribution for a housing scheme to relieve slum conditions and as an unemployment relief project.

## Estate Taxes

Difficult To Find Logical Support For Death Duties

If John J., working hard for forty, fifty or sixty years, managed to accumulate a hundred thousand dollars, by what possible logic can it be established that part of the money—all of it, if some persons had their way—should go into the State treasury at his death?

Ah, someone says, the State provided him with an opportunity to make that money!

Humbly! The State did nothing of the kind. On the contrary, John J., instead of being in debt to the State, was the State's benefactor and helper. He paid large taxes. He gave employment. He provided business leadership. He shelled out for private charities and public projects.

All down the line he paid "through the nose" for the privilege of living and operating his business and giving work to men and women and generally contributing to the maintenance and improvement and expansion of his city, his province and his country. Then, dying, he is expected to disgorge thousands more for public purposes.—Windsor Star.

## Durable World Peace

President Roosevelt Says Maintenance Of Democracy The Best Guarantee

Continued maintenance and improvement of democracy, mutual confidence and positive co-operation form the most important guarantees of a durable world peace, President Roosevelt said in addressing the governing board of the Pan-American Union of 21 American Republics in observance of Pan-American Day. "Democracy can not thrive in an atmosphere of international insecurity," he said. "Such insecurity breeds militarism, regimentation and the denial of freedom of speech, of peaceful assemblage and of religion. Such insecurity challenges the ideals of democracy based on the free choice of government by the people themselves.

"And as a logical development, we of the Americas believe that the continued maintenance and improvement of democracy constitute the most important guarantee of international peace."

## New Canadian Coins

Series Ranging From One Cent To One Dollar To Be Issued

A new series of Canadian coins will be minted this year, with the likelihood of getting into circulation shortly after the coronation, Finance Minister Charles Dunning announced at Ottawa. The denomination will range from one cent to one dollar.

Master dies and punches of the obverse bearing the effigy of King George VI, modelled by T. H. Paget of the royal mint, London, are expected here shortly.

The new coins will represent the collaboration of Canadian, British and French mints. Due to pressure of work on the royal mint in London, it was found necessary for the Canadian authorities to enlist co-operation of the Paris mint in the preparation of some of the dies.

The obverse of all the coins will bear King George's effigy, but the reverse will vary. A list of the reverse designs follows.

One dollar: A canoe manned by an Indian and a voyageur, an inlet in the background; above, the word "Canada" with the northern lights; below, the word "dollar" and the date of the year, with a graining upon the edge.

Fifty cents: Between supporters the ensigns armorial of Canada in a shield surmounted by the royal crown, "50 cents" above and "Canada" below, with the date of the year and a graining upon the edge.

Twenty-five cents: A caribou head, "25 cents" between the antlers, and surrounded by the word "Canada" and the date of the year, with a graining upon the edge.

Ten cents: A fishing schooner under sail, "Canada" above and "10 cents" below, with the date of the year, and a graining upon the edge.

Five cents: A beaver; above "5 cents" between two maple leaves, and below, "Canada" and the date of the year, with a plain edge.

One cent: A two-leaved twig of maple, "1 cent" above, and "Canada" below, with the date of the year, and a plain edge.

## Came At Right Time

Communities Should Take Advantage Of Home Improvement Plan

It has been said that one of the effects of the Home Improvement Plan which is now being promoted throughout the length and breadth of the Dominion will be to develop a "home consciousness" in the people. A combination of circumstances, two of which might be mentioned as being the popularity of the motorcar and four or five years of depression, have been responsible for many cases of lack of attention to home comforts and home surroundings. It is an accepted fact that at the present time, thousands of homes in Canada require renovation and repair.

The Home Improvement Plan has come along at a time when it is most needed and those in the building and supply trades should be quick to take advantage of their opportunity. It is because employment in the construction and allied businesses has lagged that the Dominion government agreed to make easy the borrowing of money for home improvement purposes. Because of the ramifications of the building trades in the provision of employment it is believed that if these trades become active a large number of men at present on relief will be able to go to work. Communities which give the most whole-hearted support to the Home Improvement Plan will reap the greatest benefits.—Woodstock Sentinel-Review.

## Appeals To Queen

Mrs. Alice Barnett, 20, of London, appealed to Queen Elizabeth by letter to send her husband back from Singapore, where he was ordered as a soldier three days after their marriage last year. He is due to return from Singapore until 1942. "I know you will understand how much I wish to have a husband to love and make a home for," wrote Mrs. Barnett.

Latest relief from Egypt is a jar of face cream more than 3,000 years old. The jar was a woman's or two even in those days—and wrinkles to end wrinkles, as it were.

An average of four earthquakes occur daily in Japan. 2200

## SHIRING ADDS TOUCH OF BRIGHTNESS TO WIN. SOME AFTERNOON STYLE

By Agnes Adams

Perhaps this charming Miss is looking at her engagement book to see the day scheduled for anyone who wears such a charming frock as hers is sure to be one of the most popular girls in town! Agnes Adams knows how flattering are full, puffed sleeves, and these of Pattern 4366 are distinguished by two rows of easy-to-do shirring. Don't you picture yourself in the demure, round neckline that tops an unusual yoke (also accented with shirring) and a simply cut bodice? Don't miss the way the skirt flares outward in latest fashion, or the choice of puffed or flared sleeves! You've wide selections of fabrics—among them are dainty lawn in a floral print, sheer voile, eyelet batiste, synthetic, or silk crepe.

Pattern 4366 is available in sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38, 40, 42. Size 16 takes 3 1/2 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Agnes Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Agnes Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

## Making Long Trip

Famed Glacier Priest Will Seek Preventative For Tuberculosis

A 48-year-old Jesuit priest has announced plans for an expedition to the far north to seek in the blubber of seals a preventative for tuberculosis.

Rev. Bernard R. Hubbard, famed "Glacier Priest", explorer, author and lecturer, said he would make his 11th northland expedition—this time to King Island in the Bering Sea. The trip will last a year and a half.

"We know," said the priest, "that the Russians took the White Plague to the Eskimos. Approximately 97 per cent of them are afflicted. Yet, through the profuse use of seal oil, they prolonged their lives indefinitely.

"It is our hope to find the specific or the preventative by using 190 tuberculosis-afflicted Eskimos in experiments. Dr. Victor Levine, nutrition scientist at Creighton University (Omaha, Neb.), will accompany me. He already has isolated vitamin D from the seal oil. Obviously, there are other fats or oils that have a beneficial effect on lung tissue."

Fishing Boat Lifted

Sturgeon fishing for the first time in 10 years will be allowed in two northern Manitoba lakes and in one river, E. M. Stevenson, chief fishery inspector announced. Fishermen can take 100,000 pounds from Lake Winnipeg, 20,000 pounds from Cedar Lake and 50,000 pounds from the Nelson River, near Hudson Bay.

They met after ten years. "Has your wife kept her charming figure?"

"Kept it? She has doubled it."

Short-tailed shrews, weighing only 11 grams, can catch and kill mice.

## SUNDAY SCHOOL LESSON

MAY 2

## ABRAHAM A MAN OF FAITH

Golden text: By faith Abraham, when he was called, obeyed to go out unto a place which he was to receive for an inheritance. Hebrews 11:8.

Lesson: Genesis 11:27-20:18. Devotional reading: Hebrews 11:8, 10, 17-19.

## Explanations And Comments

The Call and the Promise, 12:1-3. We think of Palestine as the ancestral home of the Jews, but they came there originally from a far country. The very word Hebrew shows this in its derivation from eber, beyond. It seems natural to suppose that the call to leave their home came to both Abraham and his father Terah at Ur (Acts 7:2-4; Gen. 11:31) and was reaffirmed to Abraham at Haran. Terah and Abraham settled there for a time, and there Terah died.

To Abraham at Haran came an unmistakable summons. Jehovah said unto him, that is, Abraham recognized God's prompting in some inward suggestion or in some outward event.

Get thee out of thy country, and from thy kindred, and from thy father's house, was the order which he received. This is an admirable expression which shows the greatness of the demand, and Abraham must count the cost before he has much to lose. He must leave behind him all that is familiar and dear.

The story of Abraham's journey, "that land that I will show thee," is definitely stated in verse 7. The coming of the patriarch to the land of promise is a great national event, which runs through the whole book.

The name Abraham (the father of a multitude, Genesis 17:5) is based, according to Professor Kent, on a similarity of sound to the Hebrew word Hamon, meaning multitude. In him all the families of the patriarchs were blended. Through the call of Abraham, the choosing of Israel, the later history of the nation, the birth of Christ, through it all God was working to the one end, the blessing of all peoples, the redemption of the world.

The Call Obedied, 12:4, 5. Abraham was 75 years old when he left Haran with Sarai his wife. Lot his nephew, and all their dependents and all their flocks and herds, to go into the land of Canaan; and into the land of Canaan they came, until the start and finish of the journey are recorded. Abraham resolved to go and he carried out his resolve. The great trek is dismissed in a sentence; nothing is said of the length of the journey, of the dangers on the way, the hardships endured; but the essential fact is stated—Abraham had faith in the divine prompting and acted on his faith.

## Airlanes Of The Future

Visioned As Flying Wings Without Tail Or Fuselage

The airplane of the future was seen as a "flying wing," tail-less and without a fuselage.

Such a ship weighing between fifty and 500 tons and capable of a speed of 1,000 miles an hour, was visioned by Lawrence D. Bell, president of an airplane manufacturing firm in Buffalo.

He said, "passengers and express will be shifted forward into the wing, leaving the fuselage as a parasitic resistance anyway. The wings will be cut back to form a 'V'."

Future ships will be powered by four engines, he predicted, adding a safety factor which would "make people remember present danger (crashes) as a page from the dark ages."

He said he believed economy in operation of the big liners would put the dirigible "entirely out of the picture."

## Kindness In Social Service

Says Twenty Per Cent Of People In England Are Underfed

Sir Francis Ploud, high commissioner for the United Kingdom, told the annual meeting of the Victorian Order of Nurses' board of directors 20 per cent of the people in England are underfed and 25 per cent of the families in England live in overcrowded.

He said the V.O.N. provided the personal touch of sympathy and kindness in social service nursing and added:

"Social obligations do not end when we pay our taxes. There should be personal and voluntary contributions to try to help along our fellow men and women who lack some of the things of life we are fortunate enough to enjoy."

Great Britain and Ireland have four telephones to every 100 persons, or a total of 1,996,897 instruments.

## Gardening

It is a good plan to use started annual flower plants secured from any seed store, greenhouse or florist for planting among tulips and other Spring flowering bulbs which will be past their best in a few more weeks. These hide the dying foliage. Then again, quick-growing annuals will always be useful for filling in any blind spots in the perennial beds where Winter has been unusually severe.

It is not too late in most parts of Canada to order and plant perennial flowers and shrubs which will arrive. Often towards the end of the season prices are lower and while the selection is not as wide as earlier, there should be a good choice.

Unless the ground was thoroughly cultivated and then allowed to lie idle the year before the lawn was sown there is bound to be a good deal of weed seed in the soil, and some of this will germinate after the lawn is sown. Such weeds should be removed constantly, especially in the earlier stages. A good lawn fertilizer every year will push the grass along sufficiently to choke out most of these offenders. The first cutting of the grass in the Spring is made with a very sharp mower to avoid pulling out plants when the ground is soft. Frequent rolling is also advised at this time.

For permanent lawns of deep green color and fine texture, good quality seed is an advisable investment. It is advisable, of course, to keep a plentiful supply of salad material like lettuce and bean sprouts, and possibly celery in the kitchen garden. The latter is set out in the garden as well as started in a nursery after all danger of frost is over. For Fall storage, planting takes place in June or even July.

## Defence Against Air Attack

New Method By Which Britain Is Able To Deal With Planes

An almost unbelievable story is told of a new method by which Britain is able to deal with hostile planes. Years of effort have perfected a range-finder, it is said, which has such accuracy that it will direct the shot from the anti-aircraft gun unerringly to its target.

In its still imperfect stages it was used in 1918. Fourteen German raiders made an attack on London, but all 14 fell before this uncanny device. From then on the raiders kept away from Britain. Let the plane zig-zag ever so much, even at a speed of 400 miles an hour, and yet this device will steer the shell unfailingly to its target. At maneuvers, 15 shots were fired at 15 moving objects without a miss.

It is electrically controlled, and the moment the range is found the shell starts on its deadly errand. It is all like a tale from witchcraft, and flying objects will be many a day destined to be one of the greatest blessings, instead of one of its potential deadliest curses.—Halifax Chronicle.

## To Chart Sea Floor

San Francisco Ship Searching For Submarine Ridge Near Norway

A straight-shooting San Francisco society heiress, Miss Louisa A. Boyd, who already has decorations from three nations for her Arctic exploits, has planned a new expedition.

She will sail from a Norwegian port aboard the sloop Velestrik to chart the sea bottom, north of Norway, and determine whether there is a submarine ridge connecting Greenland and Spitzbergen.

Miss Boyd will serve as photographer. On one of her five previous major expeditions, she bagged 12 Polar bears and was on a hunting expedition aboard explorer Roald Amundsen's former supply ship, the Hoboy, when the Italian dirigible Italia, with Amundsen and a crew of 22 men aboard, crashed in the frozen north. Miss Boyd spent months searching for the victims.

She says her ship will be set to set foot upon desolate Franz Josef Land.

## Ancient Fossils

Discovery in South America of fossils and skeletons of hitherto unknown animals which perished in quicksand and swamps 175,000,000 years ago was announced by the Harvard museum of comparative zoology.

King Henry VI. instituted Elton in 1440 as a preparatory school for King's College, at Cambridge.

## TRADE MISSION TO CUBA PLANNED FOR NEXT FALL

Ottawa.—A trade mission to Cuba and the West Indies is planned for next fall by Hon. W. D. Boler, minister of trade and commerce. He hopes to widen markets for Canadian products, particularly for seed potatoes, in Cuba, Bermuda and possibly Argentina.

Because of the virility of Canadian seed potatoes, they are in wide demand in southern countries where potatoes lose reproductive qualities. Efforts will be made to widen the Bermuda market for potatoes sown the year they are grown and shipped during winter months to London and to Canada.

This Bermuda trade has been growing for 10 or 12 years. Maritime potatoes are shipped there during the fall and planted a few weeks later. The crop is shipped back to Canada in the winter months and to London where it has been winning a wide market. Bermuda took 25,000 bushels of seed potatoes last year.

Canada has free entry to the Cuban market for seed potatoes but a prohibitive tariff faces table shipments. In the past exports have been from 250,000 to 600,000 bushels. The trade mission probably will try to knock down the barriers against the table variety. It is likely that Cuba will counter with demands for sugar tariff reductions.

Exports of seed potatoes to Argentina reached 180,000 bushels last year. This was a new trade with the South American republic and was caused by domestic potatoes suddenly losing reproductive qualities.

Meanwhile, the minister hopes to conclude the trade treaty with Australia during the summer, possibly when Premier J. A. Lyons visits Canada on his way home from the coronation and the imperial conference. Mr. Boler returned from Australia a month ago, confident a new treaty could be negotiated.

Some form of a trade treaty with India may be attempted after the imperial conference and after revision of the present Anglo-Indian treaty.

## Paris World's Fair

U.S. Planes To Be Used To Fly Passengers From London To Paris

Le Havre, France.—Rumors of wholesale shipment of United States planes destined for use in Spain were squelched here with disclosure the craft will be used to fly passengers from London to the Paris world fair. A newspaper report said five such planes were seized by police at Le Bourget field, near Paris.

Nineteen planes, dismantled and crated before they were shipped from New York, have been unloaded here. Nine have been reassembled and are making test flights. The ships will be operated by a French firm which has obtained all necessary authorization.

## New Appointments

National Defence Department Announces Changes In R.C.N.V.A.

Ottawa.—The department of national defence announces appointments in the Royal Canadian Naval Volunteer Reserve, affecting western divisions.

C. F. R. Wentz was appointed to the Saskatoon division, with the rank of acting lieutenant, and A. C. Campbell to the Vancouver division, with the rank of midshipman.

Fewer Pension Applications

Ottawa.—Congestion of pension applications before quorums of the Canadian pension commission has been eliminated. Departmental officials said that only 601 applications were now before the quorums, just enough to keep them active.

Gunner Not Replaced

Canberra.—The Australian government decided not to dispatch another of the Commonwealth's war heroes to replace Gunner Arthur Sullivan, V.C., in the coronation contingent. Sullivan was killed in a traffic accident in London.

## World Wide Air System

Service From Edmonton To Yukon To Start July 5th

Winnipeg.—An important link in the proposed all-British round-the-world air system, the 857-mile stretch from Edmonton to Whitehorse, Yukon, will be bridged July 5 when a passenger and airmail service is inaugurated, George Herring, of Ottawa, announced here.

Mr. Herring, chief airmail superintendent of the post office department, was in Winnipeg for a conference with western Canada postal superintendents.

The weekly service will be started by a Canadian commercial flying company, United Air Transport of Edmonton, and will connect with the Pan-American route from Whitehorse to Nome, Alaska, on the Pacific coast.

Imperial Airways are expected to complete the 3,700-mile route from Nome to Shanghai, China, shortest route from North America to the Orient.

Because the route through Canada to the Orient is the shortest possible line for an all-British airmail service, Mr. Herring said postal authorities hoped when the scheme is completed it will mean that bulk of Orient-bound mail will go west through Canada.

"If Canadian air mail can work up to the stage where its planes can average 1,000 pounds of foreign mail per trip, the costs of operating the trans-Canada service will be easy," Mr. Herring said.

Authorities estimated the route from Chicago to Shanghai via Nome is 4,000 miles shorter than the Pan-American clipper route over the Pacific ocean via Hawaii and Manila. The longest hop of the proposed route would be 1,000 miles over water.

## Released From Profession

Ontario Doctor's Name Has Been Removed From List

Toronto.—Dr. Robert Noble, registrar of the College of Physicians and Surgeons, stated Dr. John S. Hett of Kitchener has been released from the College because he claims he has a specific cure for cancer.

The College council "will do anything in its power to offer no aid to substantiate his claim," Dr. Noble said.

Dr. Hett announced he was notified his name was removed from the list of practising physicians in Ontario after he appeared before the College council and said he denied charges he claimed to possess a specific cure for cancer and that he guaranteed certain patients with a cure.

Dr. Hett said there was only one reason for cancellation of his license as a practising physician after 40 years in cancer research.

"That reason is that I refused to reveal the nature of the serum because I did not consider the time opportune," he said.

## Inspects Mounted Police

Contingent En Route To The Coronation Reviewed By Major-General MacBrien

Montreal.—The Royal Canadian Mounted Police detachment of 35 members en route to England for the coronation was inspected by Major-General Sir James H. MacBrien, commissioner.

Attired in full dress uniform and mounted on horses from Regina which will go with them overseas, the officers staged a parade on the ground of the 17th Duke of York's Royal Canadian Hussars in command of Deputy Commissioner S. T. Wood of Ottawa.

Rescue Sick Sailor

Montreal.—How a sick sailor was transferred from the freighter *Esso* to the liner *Alania* 700 miles out of Southampton in a heavy sea was told when the *Alania* docked here. The sailor, Arthur Westley, was picked up by a lifeboat from the liner and brought aboard in a sling.

Thrilled By Sight Of Snow

Montreal.—The sight of snow in the Rocky Mountains was one of the big "thrills" for Mr. and Mrs. W. H. Ritchie on their trip to London for the coronation. They have lived in South Africa for 24 years. They told of their trip from Vancouver as they stopped off here.

## SINGS AT CORONATION

Mr. Frederick Ranaulow, who sang as "Macbeth" in the Beggar's Opera 1,480 times, has been invited to join the choir at the Coronation. As a chorboy he sang at the Jubilee Services for Queen Victoria in 1857 and 1897.

## Sail At Own Risk

Attitude Of Government Towards British Ships Entering Spanish Waters

London.—The government's attitude that British merchant ships at their own risk was again outlined by Sir Samuel Hoare, first lord of the admiralty, in the House of Commons.

He stated, however, the government did not recognize the right of an insurgent warship outside the three-mile limit to fire at a British ship inside that limit. The insurgent ship in such circumstances could do nothing more than seize the freighter.

Further, insurgents would be held responsible for any claims for damages.

## Would Pay War Debts

Proposal Made That Britain Should Float Loan For That Purpose

London.—Rupert De La Bero, Conservative member of the House of Commons, proposed that Britain should settle her Great War debt to the United States by floating a loan in the United States.

De La Bero gave formal notice he would question the chancellor of the exchequer in the House of Commons, asking "if he was prepared to consider endeavoring to effect an arrangement that Britain should settle her war debt to the United States of America on the basis of a 50-year loan arranged in the United States, having due regard to Britain's capacity to pay."

Given Scholarship

New York.—A graduate residence scholarship in chemistry has been awarded to William A. Jones, Regina, 1932 arts graduate from the University of Saskatchewan, it was announced in a list of 164 winners of fellowships and scholarships for 1937-38 at Columbia University, New York.

## CAROL-NICHOLAS QUARREL MAY BE FAR-REACHING

The recent episode in the King-Carol-Prince Nicholas quarrel may lead to national repercussions unless the Roumanian King allows his brother to live peacefully in Bucharest with his Commoner wife. Latest reports state that the Iron Guard will attempt to overthrow the Government if Carol forces his brother into exile. Above are pictures of King Carol (left) and Prince Nicholas (right).

## U.S. Sees Treasury Deficit

Possibility Of New Taxation For Next Session

Washington.—President Roosevelt asked the United States congress for \$1,600,000,000 for next year's relief burden in a message projecting the possibility of new taxes next session.

His special message on relief needs during the 12 months beginning July 1 forecast:

Treasury deficit on June 30 of \$2,577,000,000 or \$309,000,000 over his January estimate.

A deficit in the 1938 fiscal period ending June 30, 1938, of \$418,000,000.

"I propose to use every means at my command to eliminate this deficit during the coming fiscal year," Mr. Roosevelt said.

On the basis of the president's revised estimates, the public debt would climb close to the \$35,500,000,000 mark by June 30.

Mr. Roosevelt said it was apparent there is an "immediate need for a careful survey of the present tax structure."

He regarded it as "extremely important that we should achieve a balance of actual income and outgo for the fiscal year 1938, and I appeal to you to join me in a determined effort to bring about that result."

## May Enter Politics

Canadian Legion Would Place Problems Of Veterans Before Public

Calgary.—Recommendation the Canadian Legion, British Empire Service League, enter politics actively as a national association with the object of placing before the public the conditions of war veterans will be made at the Alberta convention, in Lethbridge, next June.

The recommendation will be sponsored by the Calgary branch of the Imperial division of the legion, James Simmons, president, announced.

It is not the intention of the legion, it was explained, to organize a new political party. It would merely carry on an educational campaign to bring problems of the ex-servicemen before all Canadians.

## Making History

Queen Mary To Be First In History To See Her Son Crowned

London.—Queen Mary with her sister-in-law, Queen Maud of Norway, will have a special carriage and an escort of cavalry to Westminster Abbey on the morning of the coronation. The two queens will form separate processions with their attendants as they take their seats in the abbey.

She will be the first queen mother in British history to watch her son being consecrated to the country's service. Queen Alexandra did not attend the coronation of King George V.

Place Order For Railroad Coaches

Montreal.—Orders for 50 air-conditioned coaches for the Canadian National Railways have been placed with the Canadian Car and Foundry Company. It was announced. Some of the cars will be in service this summer.

## BRITISH WORRY OVER SCOPE OF NEW TAX LEVY

London.—Chancellor Chamberlain's "prosperity profits tax" to bolster the 1937-38 fiscal budget appeared headed for a hard fight with opposition in the House of Commons spreading to some Conservatives.

Some leaders declared they were "perturbed" over the scope of the new tax levies, while in the London financial district the proposal was termed an attempt to "soak" business enterprises.

Rumors a block of Conservative members were angered by the new tax proposals gained strength as a former Conservative minister of the exchequer, Sir Robert Horne, attacked the budget.

Designed to help bear the cost of Britain's £1,500,000,000 five-year rearmament and defence program, the new growth of profits tax would permit the government to collect up to one-third of a business man's new profits. The budget also increased the income tax to 25 per cent.

Sir Robert told the house that "taking both the income tax and the national defence contribution (new profits tax) together, many companies will have to pay as high as 45 per cent. In some cases there would be a surtax and the sum might run as high as 75 per cent."

He added he had talked with many people since the new profits tax proposal was offered, and "there are great perturbations. Unless these are abated in some way I fear some check upon the enterprise of our country."

Socialists and Labor members cheered as they listened to Sir Robert, who was chancellor in 1921-22.

## Finland Investigating Plot

Englishman Said To Have Cashed Arms There For Spain

Helsingfors.—The Finnish government ordered an investigation of charges made by the Marquess of Donegal that Finland had been made the storehouse of \$10,000,000 worth of munitions which two Englishmen plotted to run to Spain.

The war ministry denied Finland had sold arms to Spain.

Writing in the London Sunday Dispatch, Lord Donegal said the two Englishmen, Hon. Victor Hervey, son of Lord Hervey, and John Christopher Lonsdale, now in Paris, had planned to make a profit of \$250,000 each from the deal.

Lord Donegal said he had trailed the men from London to Finland and there had uncovered documents proving the plot. He said the plan was to store arms, collected in various places, in Finland for eventual shipment to Spain.

## Permits Presented

Firm In U.S. Receives Flying Rights For Ocean Air Service

Washington.—Pan-American Airways received permits from Great Britain, Canada and the Irish Free State for trans-Atlantic flying rights into those countries.

The permits were presented to representatives of Pan-American in a ceremony in the office of Daniel Roper, United States secretary of commerce, who declared: "This is the first real effort for the establishment of scheduled trans-Atlantic air service."

"Opportunities for participating in this expansion are open to all interested transport companies," he said.

## Smallpox Victim

British Sailor On Pacific Liner Dies At Coast

Victoria.—The British sailor who developed smallpox aboard the Empress of Russia, necessitating vaccination of passengers and crew of the Canadian Pacific liner before proceeding to Vancouver, died at William Head quarantine station.

The sailor, John Seickie, boarded the ship at Shanghai and was en route to his home in the Shetland Islands.

He will be buried at William Head.

## Want Car Licenses Cut.

Reduction of motor car licenses to a nominal sum of \$1 each was urged in a resolution passed at a recent meeting of the Traaers Social Credit group in Southern Alberta.

Various objections to the present basis for the license scale were advanced at the meeting, several of the speakers pointing out that a car operated for only a few hundred miles was obliged to bear a license quite as heavy as one that was operated for several thousand miles.

Prices of licenses being fixed on the wheel base was ridiculous, it was claimed. The carburetor was the instrument which should measure the amount of taxes the car owner should pay.

It also claimed that many people who own cars were debarred from operating them owing to the present license rates being too high. Also, high license fees gained nothing from tourists who came from outside the province.

## Municipal District of Inga No. 520.

### Public Notice

IS HEREBY GIVEN THAT THERE has been introduced in the Council of the Municipal District of Inga No. 520 an Amendment to Bylaw No. 11 which Bylaw No. 11 provides for the hospitalization of sick residents of the Municipal District of Inga No. 520, excepting therefrom all that portion of the Municipal District included in the Onoway Municipal Hospital District No. 7 consisting of all of sections 25 to 30 inclusive in Township 53, Ranges 1 and 2, West of the 5th Meridian.

The Amendment is for the purpose of providing for the hospitalization of sick residents of the Municipality in whole in terms of existing Agreements.

Which Agreements provide for the payment by the Municipal District to the hospitals entering into the Agreement the sum of seventy-five cents per day for public ward patients. The payment of such fees to relieve the Municipality from all or any further claim or liability for such hospitalization of such patients.

Copy of the Bylaw may be seen at the following places: Municipal Office; Heatherdown P. O., Onoway P. O., Stony Plain P. O., and Carvel P. O. And further that unless within thirty days from the Publication of this Notice at least fifteen per cent of the proprietary electors of that portion of the Municipal District of Inga No. 520 comprising all of sections 25 to 30, Ranges 1 and 2, West of the 5th Meridian, do petition the Council to submit such Amendment to the Bylaw to a vote of the proprietary electors of all of that portion of the Municipal District of Inga No. 520 comprising all of sections 25 to 30 inclusive in Township 53, Ranges 1 & 2, West of the 5th Meridian.

The Council will proceed to pass the Amendment to the Bylaw. DATED at Duffield this 31st day of March, 1937.

JOSEPH BEST,  
Secretary-Treasurer.

## Closed Season for Fishing.

In an interview given Monday by Hon. N. E. Tanner, Minister of Lands and Mines, emphasis was laid on the fact that a closed season for angling, domestic or commercial fishing existed at present for all classes of fish.

Anyone employed in any form of fishing at the present season or being in possession of freshly caught fish or endeavoring to sell the same would immediately become liable to prosecution, the Minister said.

Instances had occurred lately, Mr Tanner remarked, of people who had been guilty of an infringement of the Regulations in this respect which necessitates a warning being sent to all proprietors of restaurants and hotels to the effect that the purchase of any Alberta fish, other than the frozen product, was at the present time illegal and subject therefore to the penalties as laid down in the Act.

## Stony Plain and District.

Wednesday next, May Fifth, opens the season for the Wednesday half-holiday, when places of business in Stony Plain will be closed.

Councillor Elmer Anderson has returned from a tour of the West Coast cities.

Officer E F Lewis left this week, to take charge of the RCMP detachment at Provost. On Saturday he was given a farewell party by his friends.

The movie-picture "What Price Crime" billed for a showing here on Saturday, has been cancelled.

The Councillors of Inga M. D. are said to be negotiating for the purchase of the Brick Block on Main street, formerly occupied by the Bank of Montreal.

A local softball league is in the course of formation, with four teams in prospect; these being—Waltham League, Married Men, Pelicans, S.P.Hi. Mr H Trapp is on the organizing committee.

Mr Edw. Mayer, who had been secretary for the Stony Plain Phone Co. for several months, last week handed in his resignation to the company's directors, and this was accepted.

Flags and bunting for Coronation Day, at moderate prices, may be had at Hardwick's Departmental Store.

The grain elevators in Stony Plain and at Spruce Grove and Carvel have gone on their early closing schedule for this season. This means that these elevators will close at 12 noon on Saturday until Sept. 1.

BUTTER AND EGGS WANTED AT The Royal Cafe.

## Spruce Grove News.

Mr Wernick, a farmer from north of town, was taken to an Edmonton hospital on Sunday, for treatment of an injured hand.

Mr J F Forbes motored down from Manola last Sunday afternoon.

Mr Mathias Goebel, who accepted a position in Edmonton a short time ago, expects to move his family there about May 1st.

Sponsored by the Grove's Baseball Club, there is to be a whist drive and dance in the High Schoolhouse on the evening of Friday, April 30. Adm. 35c and 25c. Music by Vic's Oldtimers.

J H McLaughlin has purchased the purebred Short-horn bull Bugler's Supreme.

Mr John Miller, who recently moved from the Coast, has rented the Forbes cottage.

Jac Brox is in the news again—this time he is mourning the loss of seven gallons of gasoline which was siphoned from his car tank late one evening last week, after his garage had been broken into. At the same time, an attempt was made to break into a garage nearby, but the lock on this one could not be forced.

Mine Host Nadon has had another layer of cement superimposed on the walkway fronting his property on Railway avenue.

Mr Jac Nichols, the jovial restaurateur, reports a big sale of pretzels at the present time. He has a consignment of these coming in, and two more T bones.

Seeding is now well under way in this district, with farmers well pleased at the earliness of the season, but some would like to see a little more moisture.

## Alterations to Searle Grain Co. Elevator

A construction gang of the Searle Grain Company arrived here on Monday and commenced operations on Mr Grolla's grain elevator. The intention is to rebuild the driveway, and other portions of the structure, and also to erect an addition where a grain cleaner is to be installed. The wiring for the lighting and power system is to be rearranged. When the alterations are completed, the Searle Grain Co's elevator will be in an excellent position to give local grain raisers the very best service in handling their product.

## Coronation Celebration in Stony Plain.

Plans are well under way for the Tree-planting Campaign being held on Coronation Day, Wednesday, May 12th. A program has been arranged consisting of speeches by Mayor Oatway, Mr Jas Malloch, Mr W E Hayes, M.L.A. Community singing will be led by Mr F W Yeats and some items given by the school children.

This program will immediately follow the Radio Chain Broadcast and will be held on the lawn in front of the high school, weather permitting.

At conclusion of the program the trees will be planted along the streets and good co-operation is being shown in this splendid community undertaking. It is hoped everybody will plant a tree that day. There is still time to put in your order.

Mr McCulla is in charge of a sports program to be held at the Fair Grounds, in the afternoon, starting at two o'clock.

## Free Talkie-Movies on Friday, April 30

A talking movie picture which runs for 2 hours and has 11 different subjects, is being shown at Kelly's Hall, Friday, April 30, absolutely free of charge. One show starts at 3 p.m. and the other at 8 in the evening, thus giving everyone a chance to view a splendid entertaining program, profitable to themselves. The pictures are being sponsored by the General Motors dealers in Stony Plain, Sommerfield & Mayer, agents for Chevrolet and Oldsmobile motor cars.

The program is both instructive and entertaining, and has its comic as well as its serious sides. One of the features is a lesson in safety driving. It is shown from the air how one must not only drive his own car but three others as well. Safety driving is a real feature of this program and one which everyone should take to heart, both in traffic and on the highway.

In addition there are numerous other features which are instructive and entertaining. It will be well worth your while to attend one or both of these free entertainments. At Stony Plain, Friday, April 30.

Those who attend the evening show will be entertained at a dance following the pictures.
